THE LUXURY ISSUE

On stands until Jan. 15

SPECIAL PROMOTIONAL FEATURE

Our mission at Tampa Style Magazine is to bring visibility to professionals who exhibit excellence, integrity, client service and high standards that have made them preeminent and highly successful. Tampa's Dentists of the Year are selected based on survey, referrals and feedback from their professional peers. This is an ongoing campaign and we ask you to cast your vote/suggestion for your favorite professionals in our city at TampaStyleMagazine.com. The following pages exhibit this issue's Dentists of the Year.

"We are extremely honored to be recognized by the Tampa Bay Community for Tampa Style's Dentist of the Year. We are truly grateful for our entire dental team that tirelessly gives their all each and every day. We are also thankful to all our patients that have taken the time to share their experiences with us. We are humbled by your kind words."

-Dr. Nilash Patel, Dr. Nitash Patel

University of Florida Dental School Grads Dr. Nilash Patel and Dr. Nitash Patel have been serving the Tampa Bay Community for the past 17 years. They started Serenity Dental with the goal of creating a family friendly environment for all ages and for all types of dental needs. Through the years, Serenity Dental has surpassed their original vision.

Dr. Nilash Patel has used his passion for technology to make Serenity Dental one of the most advanced offices in the Tampa Bay area. The implementation of iTero 3D Digital Imaging has allowed our patients to receive Invisalign care and restorative treatments quicker and more accurate than ever before. When receiving an initial complimentary Invisalign consultation, patients can see how their teeth look before and after treatment through a 3D virtual picture. *"Patients have loved being able to be part of the process and actually get to twist and turn their 3D image and look at their own teeth from all angles allowing them to give input on what their aesthetic goals are. They also love the idea of knowing exactly what results can be achieved and knowing the exact timeline for their treatment,"* added Dr. Nilash. Dr. Nilash has also completed advanced training and

been certified by the American Academy of Facial Esthetics. Noticing a strong demand for cosmetic treatments, Dr. Nilash performs Botox Cosmetic, Botox TMJ, and Xeomin, as well as facial and lip fillers with Juvederm and Belotero Balance.

Dr. Nitash Patel has complemented his brother's passions with his own. After completing a Fellowship in Prosthodontics at the University of Florida, Dr. Nitash has dedicated his efforts to helping patients with some of the most complicated dental issues. *"I have found it extremely fulfilling to work with patients that sometimes feel hopeless and place their trust in me to bring that hope back."* Dr. Nitash has 18 years of experience in Dental Implant Surgery and Prosthetics. He has been passionate about sharing his knowledge by teaching other dentists who want to learn about implants. Dr. Nitash established the Implant Institute of Tampa, Center for Education & Excellence, with a goal of providing patients with the most advanced treatments available and to create an environment where dentists can come together to learn from each other.

Dr. Nilash and Nitash have also been very active in community outreach through organizations like FreeDOM Clinic and Mission Smiles, where free dental care is provided to the underserved. Dental mission trips have included multiple visits to Haiti, Guatamala, Honduras, and Jamaica. *"Dentistry has given so much to us that we feel very strongly about our obligation to find ways to give back."*

NITASH S. PATEL

*Implant Institute of Tampa
Center for Education & Excellence*

"I am so thankful to my dental team for sharing my vision, making our Implant Institute one of my proudest achievements. Thank you to all the mentors that have guided me in both dentistry and personal growth."

After completing his Fellowship in Prosthodontics, Dr. Nitash Patel became very passionate about Implant Dentistry and all the advancements that relate. *"Implants, although complex in itself, have actually made comprehensive care much easier and long lasting for the patient. I have struggled to find ways to make implants accessible, affordable, and comfortable for my dental community."*

Dr. Nitash has achieved this at the Implant Institute of Tampa, which he established in 2013. *"Patients can come to one office for everything implant related, from the implant itself to the crowns, bridges, and dentures that*

are made to fit them." With the use of 3D Imaging, Straumann Implant System, and the experience of having placed a 1000+ implants, he has simplified implant surgeries to be an average of 20 minutes or less. With this speed, efficiency, and accuracy, patients no longer have to fear surgery. Dr. Nitash offers complimentary implant consultations, where he takes the time to evaluate a patient's issue and educate on all options available. *"I have an extensive photo log of cases that I have completed over the years. I am usually able to consult a patient using pictures of completed cases that are nearly exact matches. This allows the patient to see pictures of each step and have a true understanding of the goals we are trying to achieve."* In addition to educating patients, Dr. Nitash is dedicated to educating other dentists on the Straumann Implant System.
